

TASK SPOOL AND SLEEVE SELECTIVE ASSEMBLY

*It gives us immense pleasure to share Task latest development i.e. **Super Micron Gauging System** having Accuracy less than **0.0005mm.**, developed & ready at our end for M/s Mahindra and Mahindra Zaheerabad Plant for their Spool and Sleeve Selective Assembly.*

On Dated 16th & 17th July 2013 M/s Mahindra and Mahindra PDI team visited M/s Task and after their successful PDI, congratulated us for this development of International quality at a very affordable price.

We are enclosing all the Systems photographs with Cg, Cgk Reports and R & R Report, and it gives us immense pride to share that both the report achievement is much beyond the expectation & agreed limit. TASK team wholeheartedly took up this challenge with total responsibility and experience of similar developments earlier using latest technology.

We have always time & again contacted you as our esteem customers whenever we had achieved our goal and looked forward for an opportunity to introduce these systems to your esteem organization.

We are enclosing the following details for your reference.

- ***ANNEXURE A - Systems Photographs***
- ***ANNEXURE B - Cg, Cgk Reports and R & R Report***

Thanking you & assuring you of our best services at all times
