Task Shim Selection System

Today in this world of Globalization and very competitive Market, lot of concentration is given into manufacturing Fuel Efficient, High Performance and Very Reliable Engines, Transmission and Axles.

M/s Task Precision Industries being in the field of Instrumentation for last 25 years has developed a very operator friendly gauging system for assembly of Engines, Transmissions and Axles, where critical shims are calculated and selected for assembly which directly increases the Performance and Efficiency of the product.

We have technically and commercially evaluated the production method, operator fatigue and Management limits and based on our study and 25 yrs. experience has designed and developed more than 100 Shim Selection Systems to esteem organizations like M/s Tata Motors Ltd., M/s Mahindra and Mahindra Ltd., M/s Eicher Volvo Ltd., etc.

Today when modernization and quality has become priority M/s Task has been recommended and our experience and service has come to their full satisfaction.

Shim Selection Systems compared to standard gauging systems is very trick and complicated, there are many hidden parameters which effect the final outcome, and only an experience company like M/s Task can do the needful as we have in-house R &D, Electronic, Software and Mechanical department and highly experience Task force team with 15 yrs. experience in this field of Shimming and Gauging.

Our Experience is backed by highly technical and competent Installation, Commission and Servicing team who are responsible of implementing this on the shop floor and motivating and training the operator from grass root level and removes all the psychological barrier of automation.
